

ETHAN OPPENLANDER

Laboratory Technician

As a Laboratory Technician, Ethan is responsible for product testing, maintenance, and repairs of equipment used in the Advantage Transportation Simulation Laboratory™. The lab provides valuable data on the impact of five environmental hazards (temperature, humidity, pressure, shock, and vibration) on the critical-to-quality attributes of biologics, pharmaceuticals, gene and cell therapy, and combination medical device products.

Ethan's knowledge and expertise in pharmaceutical equipment have proved to be invaluable in his role. He is able to troubleshoot and diagnose problems quickly, ensuring minimal downtime for equipment. Ethan is also responsible for performing routine maintenance on equipment, ensuring that all systems are running efficiently and safely.

Ethan is meticulous, paying close attention to detail and adhering to strict industry standards. He takes great pride in his work and strives to provide the highest quality service to his clients. When clients are dealing with cold chain challenges, Ethan helps by thoroughly testing products to ensure product quality through distribution. His dedication and expertise have made him an integral part of the Modality Solutions team.
