

Michael BROOKS

Technical Operations Specialist

Michael Brooks is a Technical Operations Specialist at Modality Solutions, where he plays a critical role in supporting laboratory operations and executing transport simulation studies. His responsibilities span shipping and receiving, equipment calibration, inventory tracking, and hands-on test execution. Michael ensures study protocols are followed precisely, coordinating everything from physical testing and inspections to study documentation and technical troubleshooting.

With a background that includes roles as an aviation structural mechanic, plumber, operations manager, and IT technician, Michael brings a unique combination of mechanical, hydraulic, and structural systems knowledge. His cross-industry experience reinforces his ability to maintain high-performance lab environments where safety, compliance, and precision are essential.

Known as someone who “gets things done right and fast,” Michael is valued for his reliability, attention to detail, and ability to keep projects on track. His guiding principle—“a man is only as good as his word”—reflects his dedication to delivering consistent, high-quality work.

Work Experience

U.S. Navy

Lemoore, California

Fun Facts

Michael is an avid outdoorsman and lifelong Notre Dame football fan. When he's not in the lab, you'll likely find him hunting, fishing, or cheering on the Irish during college football season.
